Update on Fresenius Medical Care Dialysate Labeling

Fresenius Medical Care North America (FMCNA) announced today that the Food and Drug Administration (FDA) has classified FMCNA's voluntary action to change the labeling on its dialysate products as a Class 1 recall.

In conjunction with this classification, and to further reinforce the importance of correct dialysate dosing, FMCNA will continue its process to place updated labels on its Naturalyte[®] and GranuFlo[®] Acid Concentrate products, and to update its hemodialysis machine operator's manuals. To date, FMCNA has notified more than 90 percent of its customers of these two labeling updates, and will continue with that effort until it is complete.

The FDA's action does not involve the removal of any FMCNA products from the marketplace.

Fresenius Medical Care is the world's largest integrated provider of products and services for individuals undergoing dialysis because of chronic kidney failure, a condition that affects more than 2.1 million individuals worldwide. Through its network of 3,119 dialysis clinics in North America, Europe, Latin America, Asia-Pacific and Africa, Fresenius Medical Care provides dialysis treatment to 253,041 patients around the globe. Fresenius Medical Care is also the world's leading provider of dialysis products such as hemodialysis machines, dialyzers and related disposable products.
